MANAGEMENT'S DISCUSSION AND ANALYSIS

Overview

Software and computing technology are transforming businesses in every industry around the world in a profound and fundamental way. Companies are rapidly adopting digital technologies to re-imagine their cost structures, increase business resilience and agility, personalize experiences for their customers and employees, and launch new and disruptive products and services. While these trends have been unfolding for a few years now, they have been accelerated because of the COVID-19 pandemic. The pandemic is estimated to have caused a 3.3% contraction of the world output in CY 2020, with advanced economies contracting 4.7%, and many sectors such as travel, hospitality, transportation, aerospace, consumer discretionary and small enterprises getting impacted severely across the world. Consequently, global technology spending declined 3.2% to about \$1.4 trillion in 2020. Within that, IT services spending declined more, down 3.9%, while Business Process Management declined by 2.4%. While the spending showed a decline on a full year basis, technology was center-stage in enterprises' response to the pandemic-related lockdowns and thereafter.

Very importantly, as consumers shifted to digital channels for most of their needs, enterprises realized the need to invest in enhancing customer experience. This significantly accelerated investments in digital transformation and cloud adoption. Demand for services around remote connectivity, cyber-security, collaboration tools, digitized processes, automation and cloud adoption, progressively strengthened in the course of the year. The global market for IT services continues to be a highly fragmented one.

Covid-19 impact on Business Outlook

The COVID-19 pandemic is a global humanitarian and health crisis that continues to impact all our stakeholders – employees, clients, investors and communities we operate in. At this time, a majority of our employees continues to work remotely. We enabled extensive use of collaboration platforms and continue to monitor the productivity of employees as they work remotely.

The future of Information Technologies

Information Technology has been one of the most revolutionary technologies for the last few decades. There are a few trends and techniques which are believed to drive Information Technology in the coming years, We are discussing about a few of them hereunder:

Machine Learning

It is the application of AI to help a system learn things and automatically improve from experience. It would help a computer to develop programs to access data and learn by themselves, using it. This will become an emerging trend in Information Technology.

Internet of things

It is the concept of connecting things to the internet and also other devices. It is a huge network of different things that are connected along with people. They collect data about their way of usage and their environment and share the same.

Block-chain

It is the technology behind bitcoins which is today being used as the backbone for various applications. It is needless to say that it will play a vital role in the future of Information Technology AND MOST OF Governments are recognizing the importance of it including Indian Govt.

Artificial Intelligence

It is a technology using which machines are allowed to behave like humans. Good examples are the voice assistants like Siri and Alexa. With every passing day, AI is evolving more and will have more applications and develop indispensability in near future.

Social Platforms:

Every individual spends a major part of their day on social media. Social Media Platforms are soon likely to become the first point of contact between the customers and the company and take the position of a website. So far, people have considered the website as the interface through which a business would get in touch with its customers or potential customers. To gather authentic information about a product or a service, people usually refer to its site now. But this is likely to change to the social media pages instead.

Architecture

Information Technology is evolving from a server-centric to service-centric world. There has been a shift from monolithic systems to fine-grained services that are reusable and distributed across the enterprise. It is expected to disjoin the business processes, applications, systems and architecture from one other.

User Experience

We are approaching an era when our ultimate aim would be to satisfy the users by providing them with a superior experience. This will require a more layered approach. Application design is a multidisciplinary exercise. Though it is handled by mainly the business-owners and IT architects now, it would be more optimized in the future. Inefficiency will be reduced and simplicity will be emphasized.

Cloud Computing

Cloud computing has been here for quite some time now and it is expected to change the future of information technology. It will help in increasing the storage capacity and storing huge volumes of data. There will be more data centers at an affordable price and it will prove to be beneficial for the business.

Opportunities and Threats:

The Current Market Size of Information Technology Industry in India. With a 6.1% growth in the year 2019, India's IT-BPM sector stood at \$177 Billion and approximating growth at this rate, the industry will develop to **\$ 350 Billion by the year 2025. India's IT Industry contributed around 7.7% to the country's GDP and is expected to contribute 10% to India's GDP by 2025.**

The fast growth in the population density in urban areas demands more facilities and resources. To meet the needs of city development, the use of Internet of Things (IoT) devices and the smart systems is the very quick and valuable source. However, thousands of IoT devices are interconnecting and communicating with each other over the Internet results in generating a huge amount of data, termed as Big Data. To integrate IoT services and processing Big Data in an efficient way aimed at smart city is a challenging task. Therefore, we proposed a system for smart city development based on IoT using artificial Intelligence (AI) & Big Data Analytics. We use sensors deployment including smart home sensors, vehicular networking, weather and water sensors, smart parking sensor, and surveillance objects, etc.

IT sector is cognizant of risks and uncertainties which are managed proactively through risk mitigation processes and strategies. Recently, our company is experiencing a constant delay of realization of receivables from valued clients and non-flexibility of existing system to extend financial facilities though the work and order position/opportunism in market are huge.

Performance and Outlook:

BGIL's reported record consolidated revenue of INR 1137.58 Lakhs during the year 2020-21 as against revenue of INR 3954.50 Lakhs for the 2019-20; Net consolidated Profit during the year 2020-21 is Rs 6.21 Lakhs. The consolidated shareholder's funds as at March 31, 2021 amount to Rs. 9198.98.

Risk and Management Perception

The Company faces general risk inherent in any business including political, legal, geographical, economical, environmental etc. and takes appropriate steps to mitigate them and reduce their impact to the extent possible. The Company has continued its drive towards stringent cost cutting measure and adopted continuous review of its activities.

Internal Control System:

The Company remains committed to maintain internal control systems and procedures designed to provide reasonable assurance for orderly and efficient conduct of business and security of its assets and for preventing their unauthorized use or disposition and detecting frauds or irregularities, if any. The Company has laid enormous significance to develop internal control systems relating to all aspects of the business and has well-documented Operational Plans & Policies which are key to any organization for operational efficiency at all levels.

Industrial Relation/Human Resource Management

Industrial relations remained cordial and harmonious during the period under review.

Statutory Compliance

As the Company is proposing new initiatives, therefore, the management is in the process to comply all statutory requirements of the Companies Act, 2013 and other applicable laws, Rules & Regulations. The company has always strived towards compliance of all statutory requirements.

IT Products Sales and Marketing

We are value-added resellers of third-party enterprise products through our direct sales force. Our sales teams are organized by industry vertical. Our global client partners receive support from our corporate marketing team to assist in brand building and other corporate level marketing efforts for various market segments.

Financial Condition

The Company has considered the possible effects that may result from the pandemic relating to COVID-19 in the preparation of its financial statements, including the recoverability of carrying amounts of financial and non-financial assets. In developing the assumptions relating to possible future uncertainties in the global economic conditions because of this pandemic, the Company has, at the date of approval of its financial statements, used internal and external sources of information including credit reports and related information and economic forecasts and expects that the carrying amount of these assets will be recovered. The impact of COVID-19 on the Company's financial statements may differ from that estimated as at the date of approval of its financial statements

Competition

We experience intense competition in traditional services and see a rapidly-changing marketplace with new competitors in niche technology areas who are focused on agility, flexibility and innovation.

We typically compete with other large, global technology service providers in response to requests for proposals. Clients often cite our industry expertise, comprehensive end-to-end service capability and solutions, ability to scale, digital capabilities, established platforms, superior quality and process execution, distributed agile global delivery model, experienced management team, talented professionals and track record as reasons for awarding us contracts.

In future, we expect intensified competition. In particular, we expect increased competition from firms that offer technology-based solutions to business problems, cloud providers and from firm's incumbent in those market segments. Additionally, in sourcing of technology services by the technology departments of our clients is another ongoing competitive threat

We have audited the internal financial controls over financial reporting of **BHARATIYA GLOBAL INFOMEDIA LIMITED (CIN No. L74999DL1994PLC062967)** ("the Company") as of March 31, 2021 in conjunction with our audit of the standalone IND AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing as specified under section 143(10) of the

Companies Act, 2013, to the extent applicable to an audit of internal financial controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2021 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note.

An impairment loss is recognised in the Statement of Profit and Loss to the extent, asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use.
