

- Pre-registration and Quick look up
- Quick visitor check in and check out
- Issue pre-configured access cards
- Take pictures of the visitors
- Print visitor's photo ID badge
- Live tracking of visitor's card activity
- Define custom information fields
- Finger Recognition of Visitors

Complete reporting

While visitors are on the premises or long gone there is a complete audit trail of their visit. Many easy to use reports are available:

- Visitors log, searchable by visited department or employee, visitor's name or card number, etc.
- Visitors currently on premises report
- Visitor's access at specific readers report
- Export reports into multiple formats

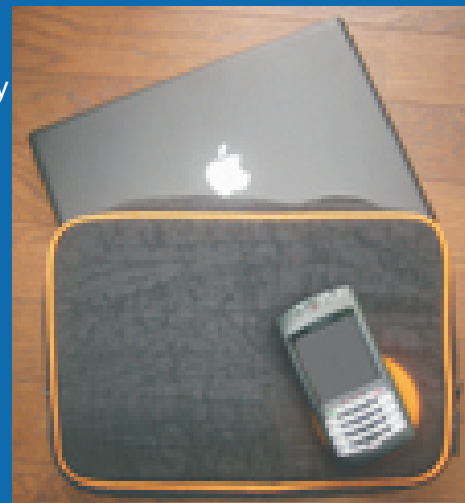

Visitor's asset tracking

Security or industrial espionage policy at many facilities prohibits visitors from bringing certain items onto the premises. Weapons, cameras and mobile phones are just a few examples.

BGIL simplifies asset detection procedure by linking items to visitors while providing them with a peace of mind by taking pictures of the items and issuing return receipts.

- Take picture of the assets
- Record descriptions and print receipts
- Return reminder at checkout
