

# TOLL MANAGEMENT SYSTEM<sup>®</sup>

Toll Management System<sup>®</sup> uses various technologies that allows the manual in-lane toll collection process to be automated in such a way that customers do not have to stop and pay cash at a toll booth. With TMS, an actual toll plaza is not even a requirement to collect tolls. The TMS equipment can be mounted on overhead gantries and/or in the pavement, which allows vehicles to be charged while they proceed at highway speeds

- Create an easy to operate and maintain system
- Increase process speed all available information had to be automatically verified, aggregated and posted in the system, with minimum human intervention
- All data is automatically consolidated and verified. Email notifications are sent to system operators in case errors or inconsistencies are detected. System operators can then access the system directly from the email links and immediately correct wrong data.
- Hot Card Filtering for fraud detection filtering.
- Multiple Toll collection modes.

"The Company is proposing to make a public issue of the equity shares and has filed a Draft Red Herring Prospectus with the Securities Exchange Board of India. The Draft Red Herring Prospectus is available on the website of the Company at [www.bgilinfo.com](http://www.bgilinfo.com), Securities Exchange Board of India at [www.sebi.gov.in](http://www.sebi.gov.in) and Almondz Global Securities Limited (Book Running Lead Manager) at [www.almondzglobal.com](http://www.almondzglobal.com)."
